

About the Nutty project

Hello, I'm Felix Kopfli.

I created the Nutty project to help build a positive future for children all over the world through shared understanding. I wanted to bring to life characters that everybody could relate to, and who would help us all think about the world we share. The stories encourage children to think about important issues, and should be interesting to look back through for years to come. There are also animations and games to support learning and discussion.

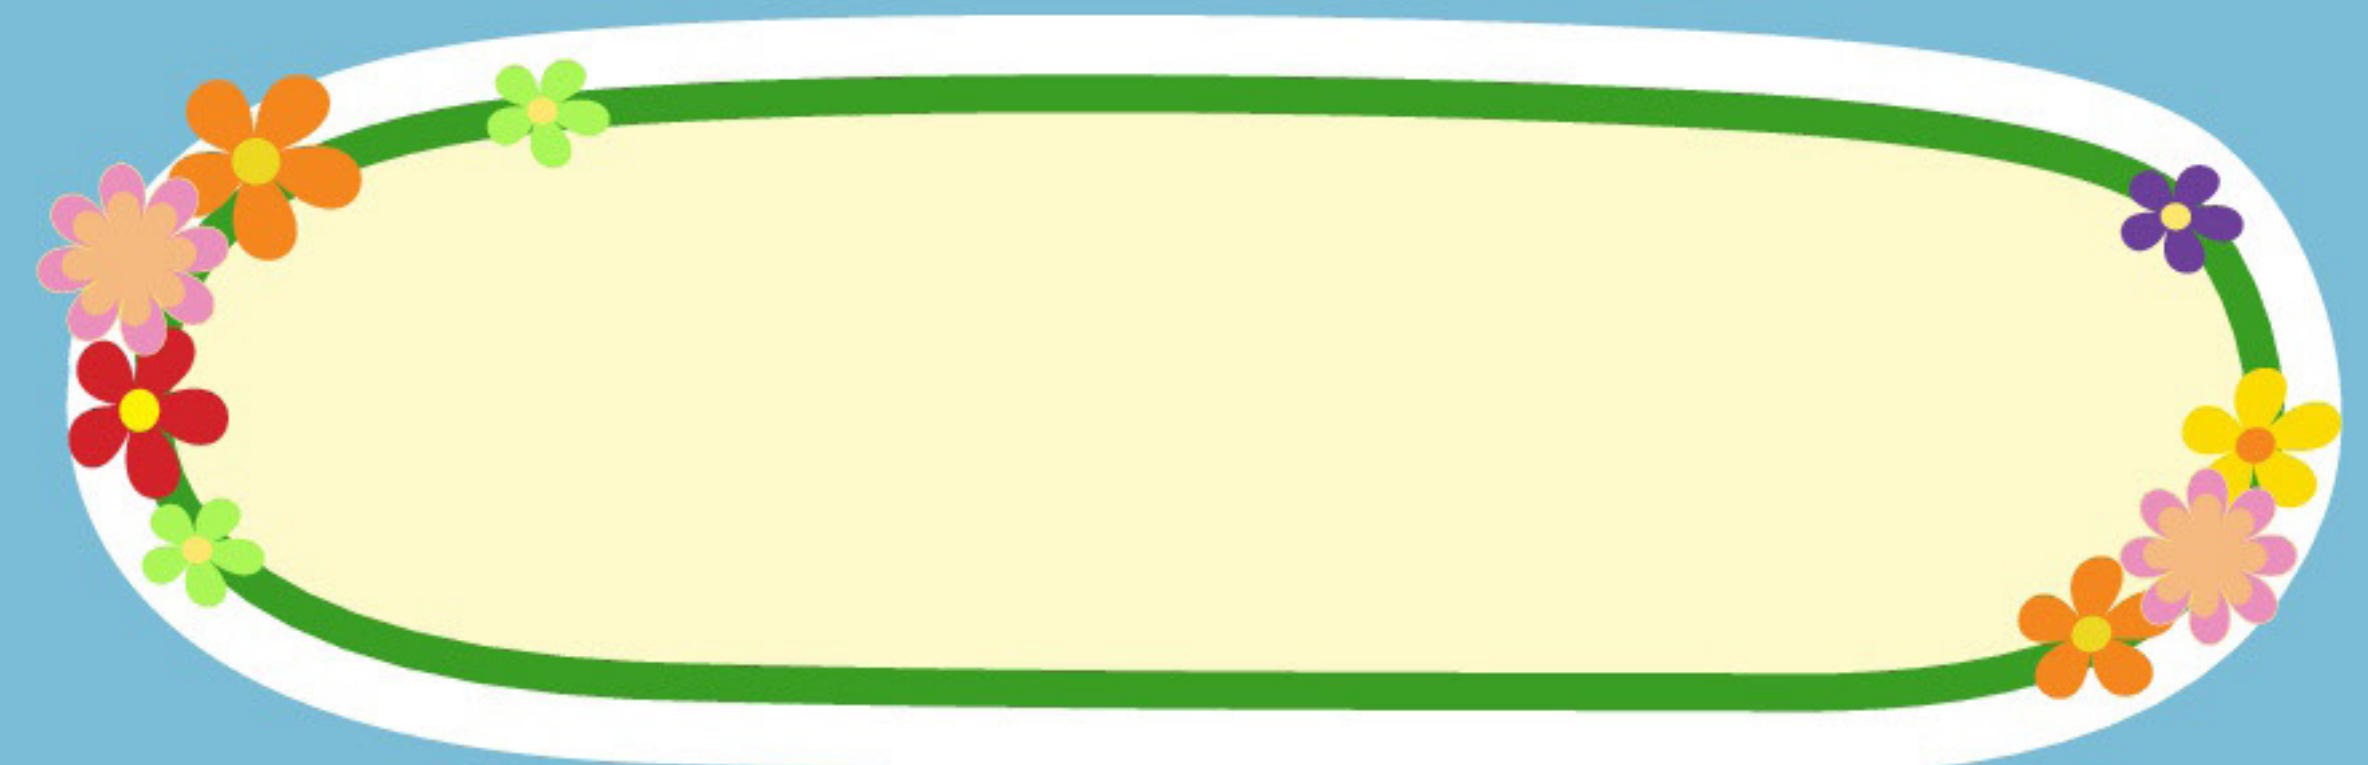

Visit www.chuna.ch to meet the like minded team who helped to create these ideas and learn more about what we hope to achieve.

P.S. Want more Nutty fun? Go to www.chuna.ch/nutty1 and enter the password **chuna8** to find free colouring sheets, handwriting practice pages, a teachers' guide, and much more from Nutty and friends!
